REDCLIFF REVIEW

VOLUME I. REDCLIFF, ALBERTA, SATURDAY, JULY 22, 1911 NUMBER 31

LEVY FIXED AT 8 MILLS

Redcliff Council Sitting As Court of Revision Arranges For the City's Finances

The village council sitting as a court of revision yesterday afternoon passed upon the assessment of city property and fixed the tax levy for the ensuing year.

The council is composed of H. O. Wheeler, of Redcliff Realty company, chairman; E. C. Daniels, of Redcliff Mill & Elevator company; A. W. Woodcock, of Redcliff Brick & Coal company.

Only one complaint was registered against the assessor's valuations and this was not sustained by the court.

The total valuation of all Redcliff property is estimated by assessor's returns at $554,000, in round numbers, the larger taxpayers being as follows: Redcliff Realty company, owner of the townsite and numerous cottages, business blocks, etc., $410,000; Bowman-Sine-Lamber Co., $15,000; Redcliff Mill & Elevator Co., $20,000; Redcliff Hotel, $25,000; Redcliff Foundry and Machine Co., $15,000.

The levy which of course is for city purposes only, was fixed at eight mills and this will yield revenue amounting to approximately $4,500.

Estimates for various purposes for the year and portion the expenditures as follows:

One mile of sidewalk on the east side of First street to South Redcliff, $2,000; salary of secretary-treasurer, the only salaried officer in the village, $600; scavenger service, $300; lights, $250; present sidewalk indebtedness, $800; incidentals, about $500.

These estimates have undoubtedly carefully made and the administration of affairs is certain to be of the most business like character.

MORE BONDS

The school trustees this afternoon decided upon an additional bond issue of $6,000 for the purpose of finishing the two upper rooms of the school building.

The Redcliff Realty company has begun the task of repairing their brick cottages with a view to making them thoroughly comfortable for winter. There are 25 in all and they will be plastered and otherwise improved, repairs being spared to give the tenants all the comforts possible.

200,000 BUSHELS OF WHEAT FOR THE REDCLIFF MILL CO.

E. C. Daniels, manager of the Redcliff Mill & Elevator Co., after having made a thorough observation of crop conditions in the vicinity of Redcliff, Bowell, Suffield and Cardstadt, is much gratified with the outlook and looks forward to a profitable season for everybody.

There are about 10,000 acres of wheat in the vicinity of Redcliff and 15,000 acres around Bowell, the yield from which is sure to swell the purses of the growers.

Mr. Daniels anticipates that 200,000 bushels of the grain will be marketed at his mill, the capacity of which is ample to convert that quantity into flour.

A detailed survey of crop conditions throughout western Canada removes all apprehension that was felt because of the recent cold wave which struck the country gives renewed assurance of a record crop. Conditions could hardly be more favorable. From 90 to 100 per cent of wheat is in bloom and indications at present point to an early harvest. With the exception of two points where frost damaged the lighter grains considerably and wheat very slightly, there is no report of a detrimental effect from the cool wave. Of reports received 81 per cent announce conditions which border on the perfect while 19 per cent have seen the mercury more or less frost or other climatic conditions which were not conducive to successful ripening.

While there has generally been more rain this year than for several years a few districts are complaining of a lack of moisture while others have had too much rain. The vast majority of sections have, however, enjoyed ideal conditions throughout the year. Western farmers appear to consider the cool wave as beneficial to the west. During the hot spell which preceded it the grain was inclined to mature too rapidly and the cool spell has had the effect of filling the heads and holding back the superabundant growth of straw which was threatened earlier. A general fear in certain sections is reported, that should frost continue or the weather remain cold, damage will certainly result to wheat, but this fear appears to have been overriden by the upward tendency of thermometers this week. Damage from hail throughout the entire west has been practically nil.

The largest consideration before the farmers and the transportation companies is the labor problem. With the removal of the immigration restrictions on United States immigrants who come in for the harvest, and the inducements which are being offered to residents of the far east and the Pacific coast it is expected that an unprecedented number of workers will come in. While prospective employers and agents working for them a short time ago regarded the labor situation as acute, the prospects are now almost as promising as in other years.

REDCLIFF REALTY ATTRACTS INVESTORS

Following are the investors of the past week in city property here:

Hezikiah Garlow, Medicine Hat, 20 lots in block 30.

Earl A. Thomson, Gadsby, 3 lots in block 35.

Tillie Woods, Redcliff, 2 lots in block 29.

Cyrus F. Clark, Calgary, 4 lots in block 29.

Ernest W. Frank, Winnipeg, 4 lots in block 20.

Luther Kanemamy, Medicine Hat, 2 lots in block 70.

JUNE FIRE LOSSES

Decrease Both in Fatalities and Monetary Loss Compared With 1910

Canada's fire losses for the month of June as estimated by the Monetary Times amounted to $1,551,150, compared with $2,568,500 for May and a million and a half for the corresponding month last year.

There were twenty fires at which the loss amounted to $10,000 and over. The largest fire occurred at Montreal when the St. Jean Baptiste church was destroyed and the loss estimated at $300,000.

Of the presumed causes of fires lightning was responsible for 23, incendiarism 7, spontaneous combustion 3, cross wiring 3, defective oil stoves 2, playing with matches and other forms of carelessness completing the list.

A gratifying feature of the fire losses last month was the decrease in the number of fatalities, when only 13 deaths by fire were reported as compared with 28 for may and 32 for June last year.

REALTY CO. PLEASED WITH ITS PRODUCT

After having operated for seven years from an office in Minneapolis, during the last few years of which time this city and its numerous industries have been founded, the Redcliff Realty company has closed that office and will move the entire equipment, records, furniture and all, to their new office building on Broadway at an early date.

This definitely marks a new stage in the progress of Redcliff and credits the city with having the entire confidence of its builders as to future advancement, and that they intend to permanently remain and devote their whole energy to their interests here is a valuable asset to Redcliff.

Today's Ball Game.

Suffield	25
Redcliff	9

"Nuff sed.

"No, pet, that is not an approaching trolly car nor the bell cow. It's the doctor's automobubblewagon rounding the corner toward the junk pile." And just then the boss at the foundry remarked, "Well, ven a man sheen gits so like, it auto."

REDCLIFF WILL GET THE C. P. R. SHOPS

Practically Certain That Site at Outskirts of this Village Has Been Chosen and Surveyors Doing Preliminary Work

That the new railroad shops of the Canadian Pacific railway about which there has been much speculation of late, and for which Medicine Hat, Bassano and Calgary have been hopefully "canditating" from the beginning, are to become a Redcliff enterprise seems now to be not a matter of doubt. Activities of railroad surveyors in this vicinity coupled with bits of information from authentic sources fully substantiate the foregoing.

The shops will be located on section 34, township 12, range 6, which is within one and a half miles from Redcliff and four miles from Medicine Hat, and on the new line to be built between Medicine Hat and Calgary. This location is ideal, near to the river, bank, and every convenience that providence could furnish as well as the excellence of the site is there and will be utilized by the Canadian Pacific for shop purposes.

The breathless suspense of the "hopeful" candidates occasioned by waiting for an official announcement at any rate may be relaxed because railroads do not do structural work with announcements. When improvements are to be made it is simply a matter of reaching a decision, making an appropriation and setting about it without the formality of a public announcement.

This explains the activity of surveyors running a spur for use in bringing material to the site of the new works on what is known as the "flats." It is authentically stated that the plans and specifications have been completed for some time and officials have been studying these with the aid of the "blueprints" with a view to determining definitely upon every detail for an early beginning of costruction work.

The announcement so long anticipated will come a few months hence in answer to the traveler's querry as he looks from one car window to the other: "What place is this?" The gentleman with brass buttons, and a punch in one hand, will reply with somewhat explanatory gestures: "This is Redcliff and these are the C. P. R. shops"—and that with be the official announcement."

LAY LARGER MAINS

Additional Improvements And Extension of City Lighting System

Extensions to the gas lighting system of Redcliff are to be made immediately by the laying of two inch mains in the alleys through blocks 18, 20, 45, 52, 58, 74, 75, 84, and 107.

Four-inch mains will be placed through blocks 75, 74, 75, 76, 77, 82, 83, 84 and 85.

The one inch pipe in blocks 1 and 3 will be taken up and two inch pipe substituted in order that the residents of lower Redcliff may have improved service.

The matter of substituting four inch pipe for the two inch main from Broadway to lower Redcliff is being considered.

STANDING ORDER FOR THIRTY TONS DAILY

As a result of an order received by the Redcliff Brick & Coal Co., for 30 tons of coal daily to be shipped to the Canada Cement Co., until further notice, the force of men in the coal mine here has been increased. With the signing of other contracts now in sight, the force of men in the mine will be practically doubled.

The Canada Cement Co. is one of the best known concerns in Western Canada. The plant of the company is located at Exshaw, Alberta. The Redcliff coal was thoroughly tested at the cement plant, and when it was found to serve the purpose the order for continuous shipments was given.

BUILDING OF THE NEW DEPOT IS UNDER WAY

Work on the new depot is progressing nicely, excavation for the foundation and basement having been completed and the concrete foundation being now under way.

The structure will be of the standard No. 5 style, dimensions 20x36 feet, and a 50-feet freight shed.

The new depot will be completed within a few weeks and give added attractiveness to the village, contributing greatly to the growth of Redcliff as an advertising medium which cannot fail to favorably impress the visitor and the passerby.

NEW INDUSTRY TO BEGIN OPERATIONS

The planing mill located in the second storey of the Redcliff Mfg. Co. building, will begin operations Monday under the management of C. M. Greenwood of Winnipeg.

Mr. Greenwood has been with a large mills in Winnipeg for the last four years and has carried out some of the most important fittings in banks and other public buildings.

The mill is equipped with all machinery necessary for doing the most exacting and artistic work and the management will conscientiously endeavor to fill the requirements of the building operations in this city and surrounding territory.

ANOTHER FACTORY

Will Make Shoes, Gloves, Leather Goods, Etc., In Redcliff

That the natural advantages of Redcliff are attracting a varied assortment of industries is evidenced by the recent announcement of a plan to build a tannery and shoe factory in Redcliff.

The prime mover in the enterprise is a gentleman from Buffalo, N. Y., now one of the leaders in that industry in the states, of thorough experience and training, and willing to invest heavily.

He spent several days in this vicinity and was thoroughly impressed with the possible success of such a industry here.

The Redcliff Realty company made a tender of a choice of sites and will otherwise encourage the promotion of the enterprise.

It is proposed to establish a tannery and a plant of machinery for the manufacture of shoes, gloves and leather novelties.

Steps toward the organization of a strong company have already been taken and developments are expected at an early date.

URGING SETTLEMENT OF THE COAL STRIKE

If the coal situation which at the present time threatens to be serious is not satisfactorily cleared it will not be because of any lack of strenuous effort on the part of provincial government officials who are employing every means in being about a settlement of some sort.

From the department of agriculture the deputy minister has sent out circulars of inquiry to all coal dealers in the province whose names are available, and returns from these are coming in rapidly and are being filed for a report which will be made as soon as the situation has been summed up.

The general attitude of the coal vendors throughout the province seems to express not so much a fear that that fuel of any kind will not be available as that dealers, in order to meet the immediate demand, may be required to overstock a higher priced coal, which would be a drag on the market in case the strike difficulties are disposed of soon, thus bringing cheaper grade in competition with the emergency supply.

Although it costs $2.00 a ton more than ordinary Galt coal to lay it down here, it is said sufficient quantities of soft coal are to be had from Pennsylvania and Ohio. So, despite their qualms, dealers will probably be forced to ship these fuels until such time as the regular sources are again turning out the more desirable quality.

Hon. J. A. Calder, acting premier, has taken steps to present the situation before the minister of labor, and it is expected that a very short time will see something of material consequence accomplished in the way of alleviating the prevailing conditions that now exist with regard to the coal supply.

ANOTHER CONTRACT FOR WELL FOR MEDICINE HAT

The Redcliff Realty company yesterday closed a contract for drilling another oil well for the city of Medicine Hat.

Work will be started at once and a depth of 2000 feet will probably be reached before the contract is completed.

Quite a number of Redcliff kid attended the circus in Medicine Hat on Thursday.

NEW BRICK COMPANY

Being Formed by Local People For the Manufacture of Pressed Brick Only

Another brick making enterprise to be located in Redcliff is now well under way and the organization is expected to be perfected soon.

The moving spirit of the concern is J. H. Farmer of Frank, Alta.

The company is to be incorporated for $250,000 and will manufacture pressed brick only with a plant having a capacity to start with of 30,000 bricks daily.

In keeping with its standing offer of "free sites to new industries" the Redcliff Realty Co. has tendered a location to the new company, which if accepted will place the new enterprise on the spur track between Broadway and the present brick plant, on block 7, and a narrow guage tramway will be used in moving materials from the pit to the plant.

Medicine Hat capital is interested in the enterprise and it is expected to be in operation at an early date.

The kilns to be installed will be of the most improved English type, and it is proposed to operate the year round.

Success is already assured the promoters by reason of the increasing demand throughout the province for building material and the superiority of Redcliff products.

BREVITIES

W. S. Bush of Strathmore was a business visitor here this week.

Mrs. D. Broadfoot and family have gone to Brownlow landing on Gull lake to spend the summer.

Aug. Buckholz of Imbro, Wis., is the guest of his brother who is one of office force of the Redcliff Brick & Coal Co.

Jas. Fleming, proprietor of the American hotel in Medicine Hat, accompanied by his son Sidythe, spent Wednesday in the city.

A. C. Yokoma, formerly city editor of the Medicine Hat News, will soon start the construction of a couple of houses on lots he recently purchased here.

Rev. A. S. Workman has returned to his home in North Manchester, Indiana, after spending some time looking after his interests in Redcliff and vicinity.

The C. P. R. is building a snow fence along the spur track to the brick plant to avoid trouble from drifting snow in the future such as was experienced last winter.

A. W. Woodcock, manager of the Redcliff Brick & Coal Co., will leave in a few days for his former home in Princeton, Minnesota, for his vacation, the first in two years. E. H. Sellhorn, his associate in the same line of business there will come to Redcliff and assume the management of the local plant during his absence.

CANADA SEVENTH IN WHEAT PRODUCTION

Canada took seventh place last year as a wheat producing country. The world's wheat production totalled 3,661,666,000 bushels and Russia produced 776,000,000. The United States ranked second and India third. Canada produced 222,459,474 bushels of grain of all kinds, of which 230,000,000 were raised in the east and 202,000,000 in the west.

The car of gas pipe for use in the construction of the mains to South Redcliff has arrived and that portion of the city will be splendidly illuminated.

Verily, Redcliff will become famous as the city of lights.

Spring Finds the Human System

Loaded With Impurities, Which Cause Pains, Aches and Feelings of Fatigue

When the Liver and Kidneys Are Overworked and Break Down Get them Right by Using

DR. CHASE'S KIDNEY-LIVER PILLS

In the spring the human system is loaded with poisons which have accumulated as a result of artificial winter life. There has been too much breathing of poisoned indoor air, too little outdoor exercise, too much eating of heavy indigestible food, especially too much meat and too little fruit.

The liver and kidneys struggle to overcome this condition, but the task is too great for them and they get sluggish and torpid, fail in their work and often become diseased themselves.

They must have help such as is given them by the use of Dr. Chase's Kidney-Liver Pills. There is no great mystery of how these pills purify the blood and take away the cause of tired, spring feelings, backaches, headaches, bodily pains or derangements of the digestive system.

If the blood is to be purified the liver and kidneys must do it. And they will, if you awaken their action by using Dr. Chase's Kidney-Liver Pills.

It will not take long to get these blood tonic and kidney action pills to use this treatment. A few hours will bring improvement and you will learn how to keep these organs healthy and active. One pill a dose, 25c. a box, at all dealers or Edmanson, Bates & Co., Limited, Toronto.

Teacher—"Why didn't the dove bring back the olive leaf the first time?"

Johnny — "Please, mum, 'cause olives are an acquired taste."—Judge.

Daughters of Mrs. Emmett

Cured Awful Ringworm

"Well over four years ago my two little girls were taken with a dreadful scaly trouble that the doctors called ringworm. They attended the ——— Hospital, ——, out-patients for a year. I had to apply their ointment with a brush, giving the children frightful pain. I also had to have their heads shaved every two weeks, but they got no better under the treatment. They used to cry with the tormenting itching, and their heads were covered with a filthy scurf and dandruff.

"About a year ago I determined to try the Cuticura Remedies. I used plenty of Cuticura Soap and anointed the Cuticura Ointment. I used only about three cakes of Cuticura Soap and three boxes of Cuticura Ointment and they were cured. Their hair is growing long and nice again. They had become so ill after their three years of suffering that I had to send one away to a convalescents' home as soon as she was cured—but now she is home, well and strong. My youngest girl was away from school nine months with the disease. I am very grateful to Cuticura and for their children's sake I hope other mothers will try it. The Cuticura Soap I will always use for it makes the hair so lovely."

(Signed) Mrs. Nora Emmett, 28, Lena Gardens, Brook Green, W., London.

BLOOD CRYSTALS.

The Latest Scientific Discovery Causes a Sensation.

"Blood Crystals" are the latest scientific discovery, likely to have a distinct and important bearing in criminal trials of the future. It is now possible to state definitely, thanks to the crystallization process, to what species of living creature any specimen of blood may belong; a full account of the marvels of this discovery is contained in an article in Pearson's Magazine, from which we quote: "Probably the most epoch-making work in biology since the time of Darwin. That is how scientific men in various arts of the world regard the newest discovery in relation to blood. With as much certainty as you and I can say of a series of colors —that is, white, black, blue, red, yellow, and green—it is now possible to identify any number of specimens as the blood of a man, a horse, a dog, a whale, a sheep, a wolf, a fox, an orang-outang, a baboon, a seal, a session, etc., merely by considering the crystals which the coloring matter forms. More—and the fact is pregnant with meaning—it is possible to say whether the blood is of a white man or a negro.

"How the discovery affects our knowledge of natural history may be told in two sentences. In the old method of classifying animals according to their tribes, the bear was always placed in the same family as the dog, the wolf, and the fox. By the new method of comparing the blood crystals of these animals it has been proved conclusively that the bear is closely related to the ursidons and the seals, and is not related to the dog, the wolf, or the fox. I have already stated that, by reason of these crystals it is possible to distinguish the blood of a negro so clearly from that of the white man that the expert could make no mistake one from the other. The inference to be drawn from this fact—and it is one which involves no illogical optimism—is that experts will soon be able to distinguish the blood of the American from that of the Chinaman, the blood of the Italian from that of the Englishman, the blood of the German from that of the Frenchman, and so on."

Built in a Day.

What probably constitutes a record in the building of churches has recently taken place at Preston, a small town in the West of Australia. From foundation to weathercock the whole building was completed in sixteen hours.

At six o'clock on the Saturday morning all that had been done was to set in the ground the four corner blocks on which the church was to stand. By seven o'clock sixty-five carpenters were hard at work. Shortly after half-past ten the floor was laid, and the four frames of the building were being hoisted into position by the skeleton of the church—66 1-2 feet long and 31 feet wide—was standing on the blocks.

Meantime dozens of painters were busy, and other helpers gathered from all parts were working with might and main to complete the outside, which was done during the afternoon. All the forces were then concentrated on the inside. By ten o'clock the seats had been installed, the matting laid, the platform and communion rail erected, the preacher's desk put in, and gas and water laid on.

Midnight on Saturday saw the church, capable of holding 600 people, fully complete, and on the following day three services were held there, at each of which the record church was crowded to overflowing.

Rasp Got the Pig.

Surely one of the hardest tests of a sheep dog is to be put in charge of a pig. That, according to one of the contributors to "Shepherds of Britain," is what happened to Rasp, a famous Midlothian collie. The owner found on his return home one day that the pig had escaped and sent the dog to fetch it. So off went Rasp in quest of what proved one of the most stubborn of the members of the docile family she ever encountered. Having been absent about twenty-five minutes, she at last appeared with a few sheep in front of her. But in the centre of the sheep was the pig, experience having taught her that the little rebel could not be driven alone.

Genesis of Life Insurance.

Life insurance originated in 1706 in London. In that year there was formed the first life insurance company. It was called the Amicable Society, for a Perpetual Assurance Office. It was a mutual benefit concern. Each member, without reference to age, paid a fixed admission fee and a fixed annual charge per share on from one to ten shares, and at the end of the year a portion of the fund accumulated was divided among the heirs of those who had died in accordance with the number of shares each dead person had held. Out of this company with its crude and imperfect methods, life insurance as it exists to-day has grown.

Wasted Sympathy.

A kindly old lady who attended a performance at the Haymarket theatre in London was much impressed by the singing of a nightingale and a lark, which forms an interesting feature of the performance. In fact, she was so much impressed that she sent an agent of the Society for the Protection of Animals to see if the birds were properly fed and cared for. He found that both nightingale and lark were purely mechanical, to appearance only a small wooden box and key to wind the machinery.

Grand Advice.

A shoemaker came to the minister asking his advice because that sweep, his landlord, had given him notice to quit and he would have nowhere to lay his head. The minister could only advise him to lay his case before the Lord. A week later the minister returned and found the shoemaker busy and merry. "That was grand advice ye gied me, minister," said the man. "I laid my case before the Lord, as ye tell't me, an' doo the sweep's deid."—Geikie's "Scotch Reminiscences."

The Stumper Stumped

A political speaker, while making a speech, paused in the midst of it and exclaimed: "Now, gentlemen, what do you think?"

A man rose in the assembly, and with one eye partially closed, modestly, with a strong Scotch brogue, replieds "I think, sir, I do, indeed, sir. I think if you and I were to stump the country together we would tell more lies than any other two men in the country, sir, and I'd not say a word myself during the whole time, sir!"

SAFETY FOR CHILDREN DURING HOT WEATHER

Every mother knows, or should know, the danger her baby runs during the hot summer months. Summer complaints come suddenly and develop so rapidly that often before the mother realizes her baby is ill he is beyond all help. Every mother of small children should keep a box of Baby's Own Tablets in the house. Tablets now and then will keep baby's bowels working regularly and his little stomach sweet. This is the secret of keeping baby healthy and of warding off cholera infantum, diarrhoea, dysentery and all other dreaded summer complaints. The Tablets are guaranteed free from all injurious drugs and may be given to the newborn babe with perfect safety. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Any woman who carries a parasol smaller than the hats she wears is too much given to exaggeration.

Regarded as one of the most potent compounds ever introduced with which to combat all summer complaints and inflammation of the bowels, Dr. J. D. Kellogg's Dysentery Cordial has won to itself a reputation that no other cordial for the purpose can aspire to. Many a child suffering from these complaints owes to the best medicine that can be procured.

"Is there? I bet that makes the wool interests feel sheepish."

The Oil for the Farmer

A bottle of Dr. Thomas' Eclectric Oil in the farm home will save many a journey for the doctor. It is not only good for children when taken with milk and sugar, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

She—"Is your friend, Mr. Sellers, a literary man?"

He—"No. Merely a successful novelist."—Boston Transcript.

Minard's Liniment cures garget in cows

One day when my little 4-year-old brother was playing in the back yard he slipped on some water and hurt himself. He came into the house crying, and said: "Mamma, why does God always freeze the water with the slippery side up?"

NOW OR NEVER
IS THEIR SLOGAN

American Speakers and writers Say We Must Get Reciprocity Now or Give It up Forever

"Now or never" is the slogan of the Reciprocity protagonist in the United States. President Taft expressed this belief in his famous speech to the New York newspapermen when he said: "The forces which are at work in England and in Canada to separate her by a Chinese wall from the United States, and to make her part of an imperial commercial band reaching from England around the world to England again, by a system of preferential tariffs, will receive an impetus from the rejection of this treaty, and if we do not have reciprocity with all the advantages that I have described, and that I daresay all sincerely believe will follow its adoption, we must take it up and try it over again in some other slippery side up."

Since President Taft has spoken many others have reiterated his words. The Boston Commercial Bulletin declares:—

"As Canada is undoubtedly destined to make as big industrial progress in the future as in the past decade, it is evident that with the lapse of time she will become less and less desirous of renewing negotiations with the United States. The time, therefore, has come for us to strike. Shall we let the opportunity pass?"

Commenting on this utterance The American Economist observes:—

"This is another way of saying that if we are going to cheat Canada in the Free Trade reciprocity dicker we had best do it right now, because, if we wait too long, Canada will get her eyes open and refuse to be cheated. Is this fair or decent or is it merely a demonstration of the Yankee smartness? The Canadians are not fools. They have developed their industries under a Protective tariff and now have an industrial future. The time for us to strike passed long ago."

Going further west we find The Minneapolis Journal echoing Mr. Taft's New York speech. In this fashion:—

"The Taft policy spells not only North American command in union, but also the doom of the British imperialistic unity. Too late, provided Congress acts, the British are awakening to the value of the prize they so fatuously rejected. Too late, if Congress rises to a level of this, perhaps the greatest piece of statesmanship effected by a Republican President since Thomas Jefferson annexed the West. Today England is out her customer, and Canada our third best. But our friend Canada grows. If we push Canada into England's arms, the trade arrangements between the two will tend more and more to shut us out."

The smitten man (fervently)—"Love you darling? Why, before I met you, I thought only of having a good time in life."—Puck.

The microscope in the hands of experts employed by the United States Government has revealed the fact that a house fly sometimes carries thousands of disease germs attached to its hairy body. The continuous use of Wilson's Fly Pads will prevent all danger of infection from that source by killing both the germs and the flies.

"A fool and his money are soon parted," "Yes, but you never call him a fool till the money is gone."—Toledo Blade.

WEAK STOMACHS MADE STRONG

THROUGH TONIC TREATMENT WITH DR. WILLIAMS' PINK PILLS

After all has been said about indigestion and stomach trouble, there is only one way to get a real cure. The blood must be made strong enough to do its own work. Indigestion disappears when the stomach has been made strong enough to digest ordinary plain food. This strength can only be given the stomach through the tonic treatment supplied by Dr. Williams' Pink Pills, which enrich the blood, strengthens the nerves and thus enables the stomach to perform the duties which nature intended it should. In every neighborhood you can find people who have been cured of indigestion or other stomach troubles after a fair use of Dr. Williams' Pink Pills, and this is the best proof that they are the one remedy to successfully do this. Mr. D. B. McLean, Sterling, N.S., says:—"For a couple of years I suffered very much from indigestion with most of the accompanying painful symptoms. As a result I became very much run down and as the medicines I tried did not give me any relief I grew melancholy and unhappy, and felt as though my constitution was breaking down. Quite accidently my attention was caught by Dr. Williams' Pink Pills, and I decided to try them, and I am happy to say that they effected a complete cure, and made my stomach as strong as ever it had been. I am glad to say a few words in praise of the medicine that cured me, and I hope my experience will benefit some other sufferer."

Enrich the blood and you banish most of the every day ailments of humanity, and you can enrich quickest and best by the use of Dr. Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Old Gent—"Pon my word, madam, I should hardly have known you, you have altered so much."

Lady—"For the better or for the worse?"

Old Gent—"Ah, madam, you could not change for the better."—Judge.

As a specialist there is no preparation that equals Mother Graves' Worm Exterminator. It has saved the lives of countless children.

With and Without Geography

A little girl was well up in most of her studies except geography. The other day her teacher sent the girl's mother to see that the girl studied her lesson. The next few days showed no improvement, and the teacher asked whether she had delivered the note.

"Yes, ma'am," was the reply.

"What did your mother say?"

"She said that she didn't know geography an' she got married, an' my aunt didn't know geography and she got married, an' you know geography and you haven't got married."

CURED IN ONE MONTH

If every woman who has Kidney or Bladder trouble, could go to Davisville, Ont., and talk to Mrs. A. Simpson, they would do just as she did—use GIN PILLS and cure themselves. "For 14 or 15 years I had Kidney or Bladder trouble, suffering at times intense pain. I doctored continually but nothing gave me permanent relief until I was persuaded to try GIN PILLS. Three or four days I received great relief, and after taking one box was completely cured."

Mrs. A. Simpson.

Write National Drug & Chemical Co. (Dept. N.U.), Toronto, for free sample. 50 cents a box, 6 boxes for $2.50, at all dealers.

The original Gin Pills are made by National Drug and Chemical Co. of Canada Limited, Toronto, are sold only in this box.

RAPID GROWTH

The Following Figures Show the Marvellous Development of Canada.

Twenty-five years ago today the first transcontinental train of the Canadian Pacific left the railway camp from Montreal for the Pacific Coast. It was a memorable occasion, marking the consummation of the biggest work that Canada had ever undertaken.

For a country with less than four millions of people to build a railway across the North American Continent and then, with the only actual transcontinental line connecting the two great oceans, is a marvellous achievement whose importance was accentuated by the fact that for many hundreds of miles it lies traversed regions altogether unknown—where men did not live—around the rock-bound northern shores of Lake Superior, across the far western plains then in utter solitude, and over Mountain ranges sky-scrapers in the Canadian Rockies.

No less wonderful has been the growth and development of Canada's great national highway during the intervening quarter of a century. The continent not merely contains a common carrier—it becomes more—a developer and Empire builder—and inland, waters—an immigration agency that has poured half a century's tide of settlers furnishing ready-made homes to the home seekers—a forcefull factor in the development of lumber and mining—an inaugurator of huge irrigation works where thousands are reclaimed from desert and the health of the invalid be restored. Its record fully justifies the name bestowed upon it by an eminent European — "Providence Incorporated."

A few figures will give some idea of the greatness of its growth:—

Its gross earnings in 1886 were a little over $10,000,000, and the net earnings less than $4,000,000, the surplus remaining fixed charges, amounting $653,444. This year's gross earnings will probably be over $104,000,000 and the net earnings about $37,000,000. The mileage then was 6,901 miles; today it is, including controlled lines, about 15,500 miles. The number of passengers then carried was 1,629,319 and the tons of freight aggregated 3,046,196. The approximate figures for the past twelve months are over 19,000,000 passengers, and 21,350,000 tons of freight. A comparison of the figures shows that a considerable reduction in the rates has taken place. In 1886 the average earnings per passenger per mile was $.10 cents and per freight averaged 1.10 cents per ton per mile. Today the figures are for passengers 1.95 cents per mile and for freight 0.800 cents per ton per mile. A comparison of the equipment then and today shows how the company has kept pace with the requirements of the traffic:—

	1886	1911
Locomotives	379	1,609
First and second class passenger cars and colonist and baggage cars	304	1,737
First-class sleeping and dining cars	47	311
Parlor, official and paymaster cars	27	65
Freight and cattle cars	8,923	50,863
Conductors vans	178	880
Boarding, tool and auxiliary cars	71	3,684

Still more marked is the increase in the engine dispatching power. In 1886 C.P.R. fleet consisted of two steamers on the Great Lakes. Today it has fifteen on the many waters. The red and white checkered house flag floats over eight Atlantic liners, four Pacific liners, twenty-two steamers on the Pacific Coast service, five on the Great Lakes service, twenty-four on the inland waters of British Columbia, and two in the ferry service on the Atlantic coast on behalf of the vessels—and this number will be increased by the building of several new steamships for the Pacific service and by the acquisition of the Dominion Atlantic railway and its steamships.

There seems to be no finality to the company's work. In addition to the large original cost of the railway and equipment hundreds of millions of dollars have been expended on improvements such as double tracking, reduction of grades, curves eliminated, replacing wooden bridges with steel structures, erecting new stations and enlarging old ones, etc., and the policy of extending branch lines wherever needed is still being vigorously pushed.

In one way only has the C.P.R. remained "as it was," and that is in the retention of the services of officials and employees. It is practically manned today as it was a quarter of a century ago. During the years, the addition of many thousands required by the expansion of the road, the total number employed only reaches 80,000 and these are stationed in almost every civilized country on the face of the earth. There was no pension fund in 1886, for none was needed. Today there are over 500 of the old faithful workers on the pension roll, none of whom receive less than $20 a month—a positive contradiction of the proverbial saying that corporations have no souls.

All this shew that the Canadian Pacific is, as stated, more than a transportation company in the generally accepted sense of the term. It is an Empire builder and its name will ever be remembered as the creator of Western Canada and a great developing factor wherever its lines penetrate.

Taft's Tight Trousers

When President Taft was seven years old his mother bought him a pair of short duck trousers. The first time they were washed they shrank badly. The boy was fat, but his mother wedged him into the trousers against his protests. He went out to play, but in a few minutes returned.

"Mamma," he said, "I can't wear these pants. They are too tight."

Why, mamma, they are tighter than my skin."

"Oh, no they are not, Billy," returned his mother. "Nothing could be tighter than your skin."

"Well, all the same, these pants are, I can sit down in my skin, but I can't in these pants."—Knoxville Sentinel.

Edison's little daughter, when visiting a friend in the nursery, brought with her a doll fitted out by her father's magic with a phonographic attachment, which excited the wonder of her less fortunate playfellow, who exclaimed in amazement:

"Why, your doll can talk!"

"Certainly," replied the proud inventor's child was: "Why, don't all dolls talk?"—Clark's Book Herald.

Take Hall's Family Pills for constipation.

When my brother was 4 years old, he was watching Ralph polishing the mirror in your dresser set so dirty?" "I guess I must have looked small," he said, when I had a dirty face," said Ralph.

Minard's Liniment Cures Distemper.

Nothing or Nobody

"You don't get along very well with your mother-in-law, I hear," said a friend to a young husband.

"Well, I'm not afraid of the bridegroom. "Nobody can. Even the food she eats doesn't agree with her. When she comes into the room everybody shuts up. The other day she got into a holding bed and the bed shut down.

Clean Stomach Clear Mind—The stomach is the workshop of the vital functions and when it gets out of order the whole system suffers in consequence. The spirits flag, the mind is dull and work becomes irksome. The first care should be to restore the stomach to healthy action and the best preparation for that purpose is Parmelee's Vegetable Pills. This medicine for years has won them a leading place in medicine. A trial will attest their value.

Agreed With Her

"Johnny," said his teacher, "if coal is selling at $6 a ton and you pay your dealer $24 how many tons will he bring you?"

"Little over three tons, ma'am," said Johnny promptly.

"Why, Johnny, that isn't right," said the teacher.

"No, ma'am, I know it ain't," said Johnny, "but they all do it."

Minard's Liniment Co., Limited.

Gents,—I cured a valuable hunting dog of mange with MINARD'S LINIMENT after several veterinaries had treated him without doing him any permanent good.

WILFRID GAGNE.
Prop. of Grand Central Hotel, Drummondville, Aug. 3, '04.

It George Ade is out of a job the next year or so he may easily acquire a position in the "Cabinet" of Gov. Woodrow Wilson of New Jersey. Mr. Ade looks so much like Mr. Wilson that when holiday visitors, politicians and other people constituents come around to shake the hand of the Governor, he could "let George do it," and they would know him from the real goods.—Chicago Tribune.

The Trouble With Him

Simpson was one day arrested and brought into the police court.

Said the justice: "What is your name?"

"What is your name?" demanded the justice.

"Why, I don't understand. What did you say your name is?"

"Why, my name is Simpson."

Turning to the policeman the justice said: "Here, officer, what is this man charged with?"

"Faith, your honor, and I think it's sodywather."

THAT AWFUL BACKACHE

Cured by Lydia E. Pinkham's Vegetable Compound

Morton's Gap, Kentucky.—"I suffered two years with female disorders, my health was very bad and I had a continual backache which was simply awful. I could not stand on my feet long enough to cook a meal's victuals without my back nearly killing me, and I would have such dragging sensations that I could hardly bear it. I had soreness in each side, could not stand tight clothing, and was irregular, was completely run down. On advice I took Lydia E. Pinkham's Vegetable Compound and Liver Pills and am enjoying good health. It is now more than two years and I have not had an ache or pain since. I do all my own work, washing and everything, and never have the backache any more. I think your medicine is grand and I praise it to all my neighbors. If you think my testimony will help others you may publish it."—Mrs. Otha Woodall, Morton's Gap, Kentucky.

Backache is a symptom of organic weakness or derangement. If you have backache don't neglect it. To get permanent relief you must reach the root of the trouble. Nothing is known of will do this so surely as Lydia E. Pinkham's Compound.

Write to Mrs. Pinkham, at Lynn, Mass., for special advice. Your letter will be absolutely confidential, and the advice free.

MIXING UP

BY JOE GUSH

A mosquito serenade or even a runaway team moves not "Mine Host" Broadfoot to fits of anger nor bursts of passion. This night, however.

When you are about to send a telegram from the Medicine hat office of the C. P. R. in the Alberta Hotel, hesitate, and then go down and send it by slow freight. It will reach its destination sooner.

The idea of establishing a stage line between this city and Medicine Hat is good. It will result in great convenience to the Medicine Hat people who are chafining to come here daily and will prove profitable for the originator of the plan.

Hon. C. R. Mitchell, attorney general, is an enthusiastic believer in the future of Redcliff. This is a confirmation of the claims of other local believers, inasmuch as Mr. Mitchell has shown in his official life that his judgment is the best.

L. Clark, a traveling salesman for a manufacturing concern and well known throughout the west, was a visitor here a few days ago. He almost neglected business, so interested did he become in the purchase of lots here.

"I had no idea Redcliff was such a place," said Mr. Clark. "I have often observed the hotel from the train but did not know that there were so many people living here."

Mr. Clark bought a couple of residence lots near the school house.

Advertise Redcliff by sending the REVIEW to people whom you think would add to the good citizenship of the town.
